RADIOLITE #300

TECHNICAL DATA SHEET

Packaging Description Color Specific Gravite	y.	20 kg kraft paper bag Calcined diatomite filter aid Pink 2.2
Typical Physical Properties		
Moisture	% Maximum	3
pН		7
Permeability	Darcies	0.23
Wet Density	g/cm³	≤ 0.43
+ 150 μm	%	≤5
Ignition Loss		0.5
Particle Size Distribution (%) Laser		
>40 µ	24.04.001 (20) 24301	17.1
40-20		34.9
20-10		24.2
10-5		14.1
5-2		7.7
<2		2.0
Median Particle Size μ		21.8
Chemical Analysis (%)		
SiO ₂	,313 (70)	92.0
Al 2 O3		4.2
Fe 2 O 2		1.7
CaO		0.4
MgO		0.4
Na z O		0.4
Others		0.9

The physical and chemical properties of Radiolite® products are typical, average values obtained using generally accepted testing methods. They are subject to normal industrial production variations and should not be used as specifications. They are supplied as Technical Support information and are subject to change without notice.
